

Here is what one newspaper says about a school you will tour during this workshop:

"A new 'green' middle school building opening Tuesday in Kenton County has raised the bar for this region in 'high-performance' design."

Twenhofel . . . not only incorporates energy-saving principles into almost every feature of the 111,000-square-foot school, but it makes the building itself a learning experience for students."

**--Cincinnati Enquirer Editorial
Monday, January 2, 2006**

HIGH PERFORMANCE SUSTAINABLE SCHOOLS WORKSHOP

Cincinnati Airport Marriott • 2395 Progress Drive •
Hebron, Kentucky

March 23 and 24, 2006

School districts around the country are finding that High Performance design, renovation and operation can help save money and provide healthier, more effective learning environments. This workshop is for **school superintendents, board members, facilities managers, architects** and **engineers** who want to apply High Performance concepts to their next construction or renovation projects.

Featured Site Visits

Participants will learn High Performance principles and will visit two of Kentucky's first High Performance schools. The experts who led the projects will tell their stories and the process of their journeys, explaining and showing High Performance design elements that are improving the way schools are being built.

Registration Form

First Name _____ Last Name _____

First Name as you would like it to appear on your name badge _____
